

Hi Yossi,

At your request, we evaluated keshet 's product,ie.Deburn, Debite, Debleed, to see if it is worth promoting in Taiwan market.

The Keshet Deburn, Debite, Debleed can be the essential medical care in the family, school, hotel,mountain climbing,camping ...etc as first aid support.

These are my own experiences when I get cut by accident or burned when I cooked or unbearable itch by bug bite. As a result, we believe the KESHET product is right for us and we will recommend for a further business development with them.

Sincerely,

Stephen T.A. Pan

Managing Director

Jet Asia International Corporation Ltd.
